

Principle Adverse Impact Statement

Annex 1
December 2022

Financial market participant Alder II, Stockholm Sweden, LEI: XXX

Summary

Alder II, Stockholm Sweden, (LEI: XXX) considers principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this means ensuring that the investments do no significant harm to any environmental or social objective.

The present statement is the consolidated statement on principal adverse impacts on sustainability factors of Alder II.

This statement on principal adverse impacts on sustainability factors covers the first reference period from 1 January to 31 December 2021 and reporting for the period of 1 January to 31 December 2022 on the indicators for adverse impacts of Table 1. Indicators of Table 2 and 3 in Annex 1 are described and applicable in line with our Sustainable Investment Objective.

Description of principal adverse sustainability impacts

Indicators applicable to investments in investee companies

Table 1 - Description of the principal adverse impacts on sustainability factors

CLIMATE AND OTHER ENVIRONMENT-RELATED INDICATORS						
Adverse sustainability indicator		Metric	Impact 2022	Impact year 2021	Explanation	Actions
Greenhouse gas emissions	1. GHG emissions	Scope 1 Tons co2e	NA	1438		Alder is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. All our portfolio companies are to set targets and roadmap on Climate Change Scope 1&2 and Scope 3 in line with the Paris agreement. During 2021 and 2022 we have
		Scope 2 Ton co2e	NA	676		
		Scope 3 Tons CO2e	NA	11225		
		Total GHG emission CO2e	NA	13339		
	2. Carbon footprint	Carbon footprint Tons CO2e/M€ capitol	NA	169		- aligned our way to measure GHG scope 3 according with GhG protocol supported by external consultant company, Ramboll.
	3. GHG intensity of investee companies	Carbon intensity of investor companies Tons CO2e/M€ revenue	NA	11		- Performed a EU Taxonomy project together with our portfolio companies to learn, align and produce data for eligibility and

	4. Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	NA	0		<p>alignment.</p> <p>During 2022 we are Implementing a platform for managing all Sustainability Data. SustainLab</p> <p>We will measure and visualize our Targets (Race to Zero, Alignment, Impact) for all our Portfolio companies during 2023.</p>
	5. Share of renewable energy consumption and production	% renewable consumption of total consumption.	NA	49%		
	6. Energy consumption intensity per high impact climate sector	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector	NA	N/A		
Biodiversity	7. Activities negatively affecting biodiversity-sensitive areas	Negative impact on Biodiversity % of companies	NA	13%		
Water	8. Emissions to water	Emissions to water Tons	NA	0%		
Waste	9. Hazardous waste and radioactive waste ratio	Hazardous waste generated Tons	NA	0%		

INDICATORS FOR SOCIAL AND EMPLOYEE, RESPECT FOR HUMAN RIGHTS, ANTI-CORRUPTION AND ANTI-BRIBERY MATTERS

Adverse sustainability indicator	Metric	Impact [year n]	Impact [year n-1]	Explanation	Actions
Social and employee	10. Violations of UN Global Compact	Share of investments in investee	NA	0	

matters	principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational enterprises	companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises

In addition to the set of mandatory indicators above, we are measuring a couple of additional indicators subject to customer satisfaction, implementation of management systems, employee satisfaction and employee competence development.

Description of policies to identify and prioritise principal adverse impacts on sustainability factors

We have Our Responsible Investment Policy describes the framework governing our approach to responsible investments and ESG/sustainability. Our ESG strategy identifies four core areas of interest:

Engagement policies

Alder is a member and a signatory of the UNPRI, the SVCA and the EVCA. In line with the guidelines from these organisations, it puts a high value on professional conduct in all aspects, including ESG. ESG is integrated in all Alder's core processes, from exclusion to investment, development, and exit.

Alder strongly believes that transparency, engagement, cooperation and partnership is how we can leverage a positive result for the resilience of our Portfolio Companies and our funds.

We have a clear engagement policy for our portfolio companies – and through that we have a program to engage, support and share best practice.

Alder.

We engage with Stockholm Resilience center to be able to offer executive training sessions to our portfolio companies and stay ahead of the sustainability agenda.

We engage with our investors and reports on ESG development twice yearly at LP meetings.

We engage with PRI, PE Growth Sustainability network and SVCA Invest Europe to share and learn from our peers and follow the European development of the Green Deal.

References to international standards

Alder's Sustainable Investment Policy and hence its assessment of PAIs is based on international norms and conventions including:

Paris Agreement under the United Nations Framework Convention on Climate Change - As a signatory to Net Zero Asset Managers Initiative we are committed to supporting the goal of net zero greenhouse gas emissions by 2050 or sooner, in line with global efforts to limit warming to 1.5°C.

UN Global Compact

OECD Guidelines for Multinational Enterprises

UN Guiding Principles for Business and Human Rights

Universal Declaration of Human Rights

UN Principles for Responsible Investment (PRI) and the Principles for Sustainable Insurance (PSI)

Task Force on Climate-related Financial Disclosures (TCFD)

Historical comparison

Alder has published Sustainability reports since 2018, they can be found on www.alder.se. The choice of indicators has evolved since the first year and 2021 years report was to a large extent aligned with the PAI indicators in this document,

Table 2 - Additional climate and other environment-related indicators

CLIMATE AND OTHER ENVIRONMENT-RELATED INDICATORS						
Adverse sustainability indicator		Metric	Impact [year n]	Impact [year n-1]	Explanation	Actions
Water, waste and material emissions	6. Water usage and recycling	Average amount of water consumed by the investee companies (in cubic meters) per million EUR of revenue of investee companies	NA	9400		
	13. Non-recycled waste ratio	% of non-recycled waste generated by investee companies	NA	25%		

Table 3 - Additional indicators for social and employee, respect for human rights, anti-corruption and anti-bribery matters

INDICATORS FOR SOCIAL AND EMPLOYEE, RESPECT FOR HUMAN RIGHTS, ANTI-CORRUPTION AND ANTI-BRIBERY MATTERS						
Adverse sustainability indicator		Metric	Impact [year n]	Impact [year n-1]	Explanation	Actions
Social and employee matters	2. Rate of accidents	Rate of accidents in investee companies expressed as a weighted average	NA	NA	Included counted near accidents	

4. Lack of a supplier code of conduct	Share of investments in investee companies without any supplier code of conduct (against unsafe working conditions, precarious work, child labour and forced labour)	0	30%	Included yearly assessments via surveys/and supplier audits.	
6. Insufficient whistleblower protection	Share of investments in entities without policies on the protection of whistleblowers	0			
15. Lack of anti-corruption and anti-bribery policies	Share of investments in entities without policies on anti-corruption and anti-bribery consistent with the United Nations Convention against corruption	0		Included in the CoC	

Alder.
