2021 PILOT

Alder Funds

Generated 2022-08-18

About this report

The PRI Reporting Framework helps to build a common language and industry standard for reporting responsible investment activities. **Public RI Reports** provide accountability and transparency on signatories' responsible investment activities and support dialogue within signatories' organisations, as well as with their clients, beneficiaries and other stakeholders.

This **Public RI Report** is an export of the signatory's responses to the PRI Reporting Framework during the 2021 reporting period. It includes the signatory's responses to mandatory indicators, as well as responses to voluntary indicators that the signatory has agreed to make public.

The information is presented exactly as it was reported. Where an indicator offered a multiple-choice response, all options that were available to select from are included for context. While presenting the information verbatim results in lengthy reports, the approach is informed by signatory feedback that signatories prefer that the PRI does not summarise the information.

Context

In consultation with signatories, between 2018 and 2020 the PRI extensively reviewed the Reporting and Assessment processes and set the ambitious objective of launching in 2021 a completely new investor Reporting Framework, together with a new reporting tool.

We ran the new investor Reporting and Assessment process as a pilot in its first year, and such process included providing additional opportunities for signatories to provide feedback on the Reporting Framework, the online reporting tool and the resulting reports. The feedback from this pilot phase has been, and is continuing to be analysed, in order to identify any improvements that can be included in future reporting cycles.

PRI disclaimer

This document presents information reported directly by signatories in the 2021 reporting cycle. This information has not been audited by the PRI or any other party acting on its behalf. While this information is believed to be reliable, no representations or warranties are made as to the accuracy of the information presented.

The PRI has taken reasonable action to ensure that data submitted by signatories in the reporting tool is reflected in their official PRI reports accurately. However, it is possible that small data inaccuracies and/or gaps remain, and the PRI shall not be responsible or liable for such inaccuracies and gaps.

Our commitment

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
SLS 1 S1	CORE	N/A	N/A	PUBLIC	Our commitment	GENERAL

- Why does your organisation engage in responsible investment?
- What is your organisation's overall approach to responsible investment?
- What are the main differences between your organisation's approach to responsible investment in its ESG practice and in other practices, across asset classes?

Responsible Investment is integral in our investment belief and our Why - "To generate attractive returns by owning and developing companies that improve the long term sustainability of our environment". We invest in companies that are likely to be successful in a changing world, with climate change, decreasing biodiversity, resource scarcity, demographic shifts and technological innovation. In our view, companies that are well positioned and resilient in a changing world are also more likely to provide value growth, at lower risk, to our investors. Our portfolio companies are chosen on the basis that they can contribute to solutions to some of the challenges that we face. When we make our investments, we always look for a value proposition based on an environmental benefit. Our approach is to integrate responsible investment into the entire investment process, from sourcing of new investments, the investment process, ownership and exit. We don't see ESG as a separate practice but as a natural part of everything we do.

Annual overview

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
SLS 1 S2	CORE	N/A	N/A	PUBLIC	Annual overview	GENERAL

- o Discuss your organisation's progress during the reporting year on the responsible investment issue you consider most relevant or material to your organisation or its assets.
- o Reflect on your performance with respect to your organisation's responsible investment objectives and targets during the reporting year. This might involve e.g. outlining your single most important achievement, or describing your general progress, on topics such as the following:
 - o refinement of ESG analysis and incorporation
 - o stewardship activities with investees and/or with policy makers
 - o collaborative engagements
 - o attainment of responsible investment certifications and/or awards

Alder's funds have sustainability as an overall goal. Both Alder funds are classified within Article 9 according to the EU regulation on sustainability-related information in the financial services sector (SFDR). At Alder, we continuously develop ESG analysis and incorporation. Priorities during 2020 include further development of some key processes and tools, including - an updated RI policy, - development of the environmental impact assessment tool - Due Diligence model and guidelines upgrade. Another focus area has been to enhance competence of the entire investment team in environmental topics. All Alder employees have completed an education in the Planetary Boundaries framework, which is applied in the assessment of potential investment. With particular focus on biodiversity, seminars were arranged with presentations by environmental specialists and researchers.

Next steps

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
SLS 1 S3	CORE	N/A	N/A	PUBLIC	Next steps	GENERAL

What specific steps has your organisation outlined to advance your commitment to responsible investment in the next two years?

Our commitment remains strong and is integrated in our overall investment belief and "why". We continue to grow, evolve and improve and to drive the growth of the positive environmental impact of our portfolio companies, while also aiming for operational excellence across ESG factors. Focus areas in the coming years include - Climate change - improve reporting from portfolio companies, to achieve better coverage of Scope 3 emissions (Scope 1 and 2 and selected Scope 3 already reported) - Biodiversity - continue building competence in this area, identify ways to integrate into investment and ownership activities.

How does the board or the equivalent function exercise oversight over climate-related risks and opportunities?

- ☑ (A) By establishing internal processes through which the board or the equivalent function are informed about climate-related risks and opportunities. Specify:
 Climate related risks and opportunities are included in long term strategy and business plan development. Processes to support climate-related risk and opportunity focus include: - Climate scenarios on CEO/board strategy day agenda - KPI reporting and monitoring including climate change
- ☑ (B) By articulating internal/external roles and responsibilities related to climate. Specify:

Roles and responsibilities are defined in the Alder Way handbook. Board - overall strategy inclusion and long term integration, CEO - executive responsibility to mitigate risks and capture opportunities, Sustainability ambassador - internal champion and project management, Alder head of sustainability - sounding board, coordinating and supporting portfolio company progress.

- ☒ (C) **By engaging with beneficiaries to understand how their preferences are evolving with regard to climate change. Specify:**
Climate benefits are created in close cooperation with customers and suppliers, portfolio company opportunities and risks are identified and realized by understanding and improving climate impact across the value chain. For example, by quantifying climate impact of different customer choices in an installation project (Umia) or enabling customers to change to more climate friendly refrigeration media (Samon).
- ☒ (D) **By incorporating climate change into investment beliefs and policies. Specify:**
Climate change is included in Alder's investment belief and focus on companies with environmental benefits. We use the Planetary Boundaries framework as a tool to integrate environmental factors into the investment selection process, and climate change is a key boundary that also strongly influences several other boundaries such as biosphere integrity. For more detail, please see our Responsible Investment policy or Sustainability Report.
- ☒ (E) **By monitoring progress on climate-related metrics and targets. Specify:**
All portfolio company report annually on CO2 emissions - scope 1, 2 and selected scope 3 emissions. In addition, portfolio companies strive to assess, measure and grow the climate positive impact of their operations.
- ☐ (F) By defining the link between fiduciary duty and climate risks and opportunities. Specify:

What is the role of management in assessing and managing climate-related risks and opportunities?

- ☒ (A) **Management is responsible for identifying climate-related risks/opportunities and reporting them back to the board or the equivalent function. Specify:**
Climate-related risks and opportunities are a required element of overall company strategy and as such needs to be proactively assessed, analysed and included in recommendations and plans.
- ☒ (B) **Management implements the agreed-upon risk management measures. Specify:**
As elements of the overall business plan, Management's responsibility is to implement risk management measures as well as actions to capture opportunities related to climate change.
- ☒ (C) **Management monitors and reports on climate-related risks and opportunities. Specify:**
Reporting on climate related risks and opportunities are included in overall board reporting on a regular basis. Climate change risks and opportunities are included in the annual overall strategy planning process. KPI:s are reported on an annual basis.
- ☒ (D) **Management ensures adequate resources, including staff, training and budget, are available to assess, implement and monitor climate-related risks/opportunities and measures. Specify:**
All portfolio companies appoint a sustainability ambassador to coordinate the portfolio companies' ESG efforts. However, it is important that the implementation and monitoring of plan is integrated into day-to-day operations and a part of the responsibility of the different functions.
- ☒ (E) **Other roles management takes on to assess and manage climate-related risks/opportunities, please specify:**

Empowering, educating and inspiring the entire organisation to identify and realize climate - for example, For example, marketing and sales to understand customer expectations and finding emissions reductions opportunities downstream in the value chain, purchasing functions identifying low-carbon alternatives to materials choices and transports.
